and Lactation Friendly New York

Benefits of Breastfeeding/Chestfeeding

Breastfeeding/chestfeeding gives your infant the best possible start in life, and helps mom or the lactating parent stay healthy too! The American Academy of Pediatrics (AAP) recommends exclusive breastfeeding for approximately 6 months followed by continued breastfeeding with complementary foods for at least 2 years and beyond as mutually desired.

PROTECT

BREAST/CHESTFEEDING PROTECTS YOUR BABY'S IMMUNE SYSTEM, MEANING THEY WON'T GET SICK AS OFTEN! IT ALSO PROTECTS AGAINST OBESITY, DIABETES, ASTHMA, SIDS, AND OTHER CONDITIONS. BREAST/CHESTFEEDING REDUCES A MOM OR LACTATING PERSON'S RISK OF BREAST AND OVARIAN CANCER TOO!

NOURISH

BREAST/CHESTFEEDING IS THE BEST NUTRITION YOU CAN PROVIDE FOR YOUR BABY. IT HAS ALL THE NUTRIENTS YOUR BABY NEEDS - FOR FREE! BREAST/CHESTFEEDING CAN SAVE FAMILIES ABOUT \$1500 PER YEAR WHEN COMPARED TO FORMULA FEEDING.

BOND

BREAST/CHESTFEEDING HELPS CREATE A STRONGER BOND BETWEEN MOTHER (OR LACTATING PARENT) AND BABY. DAD OR NON-LACTATING PARENT CAN BOND TOO BY HOLDING THE BABY SKIN-TO-SKIN, WHICH HELPS KEEP BABY COMFORTED, SECURE, AND WARM.

BFREE

FUNDED BY THE NEW YORK STATE DEPARTMENT OF HEALTH, THE BREASTFEEDING RESILIENCY, ENGAGEMENT, AND EMPOWERMENT (BFREE) COALITION SUPPORTS PARENTS IN REACHING THEIR BREAST/CHESTFEEDING GOALS.
